SKILLS

- General skills: Adaptability, Problem-solving
- Programming Languages: C, C++, Python, JS, Java
- Web Development: HTML, CSS, React, Django, Spring Boot
- Tools & Technologies: Docker, Figma, Git
- Machine Learning : Pandas, NumPy, Neural Networks, RAG

EDUCATION

UM6P 10/2022 - 10/2024

Benguerir

Software development

LANGUAGES

- arabic: native
- english: good
- french: basic

SUMMARY

I am Ayoub Elidryssy, I am a student at UM6P in 1337 Coding school, I am passionate about both of full-stack development and machine learning, I am now actively seeking new opportunities to apply and expand my technical skills while contributing to impactful projects. Passionate about problem-solving, continuous learning, and the intersection of technology and innovation, I am eager to join a dynamic team where I can continue to grow and contribute.

EXPERIENCE

Back-end Developer intern

UM6P July 2025 - Present, morocco Ben Guerir

- Developed Spring Boot APIs for a pharmacy management system, implementing business logic and secure data access with Spring Security and Spring Data JPA.

PROJECTS

- **Transcendence**: A full-stack web app for playing ping pong with user accounts, matches, and tournaments using Django, PostgreSQL, JS, HTML, and CSS.
- **Inception**: A DevOps project focused on Docker and containers to build and manage services in isolated environments.
- **Webserv**: A simple HTTP web server written in C++, inspired by Nginx, supporting GET, POST, and DELETE methods.
- **Trip Duration Prediction**: A machine learning project based on a Kaggle dataset where I predicted taxi trip durations using Ridge regression
