Skills

- Soft Skills
  - Adaptability, Problem-solving

- Hard Skills
  - Programming Languages: C, C++, Python, JavaScript
  - Web Development: HTML, CSS, Reactjs, Django
  - Tools & Technologies: Docker, Figma, Git
  - Machine Learning : Pandas, NumPy, Matplotlib,, Neural Networks, RAG

Education

UM6P 10/2022 - 10/2024

📍 Benguerir

Development

Profile

i am Ayoub Elidryssy, i am a student at UM6P in 1337 Coding school, i am passionate about both of full-stack development and machine learning, I am now actively seeking new opportunities to apply and expand my technical skills while contributing to impactful projects. Passionate about problem-solving, continuous learning, and the intersection of technology and innovation, I am eager to join a dynamic team where I can continue to grow and contribute.

Projects

- **Transcendence:** A full-stack web app for playing ping pong with user accounts, matches, and tournaments using Django, PostgreSQL, JS, HTML, and CSS.

- **Inception**: A DevOps project focused on Docker and containers to build and manage services in isolated environments.

- **Webserv:** A simple HTTP web server written in C++, inspired by Nginx, supporting GET, POST, and DELETE methods.

- **Trip Duration Prediction:** A machine learning project based on a Kaggle dataset where I predicted taxi trip durations using Ridge regression
