SUMMARY

Machine Learning engineering student at **UM6P** in **1337 Coding School**, specializing in **machine learning** and **full-stack development**. Actively seeking opportunities to apply my technical skills and contribute to impactful tech projects within a dynamic team.

PROJECTS

Credit Card Fraud Classifier

🔗 Repository

- Built a modular **machine learning** classification model in **Python** to detect fraudulent transactions.
- Mitigated severe **class imbalance** through targeted preprocessing, evaluating performance via **Precision-Recall**, **F1-score**, and **ROC-AUC** curves.

Trip Duration Prediction

🔗 Repository

- Developed a predictive pipeline using **Ridge Regression** to forecast taxi trip durations based on a **Kaggle dataset**.
- Conducted extensive preprocessing and **feature engineering** to extract spatial/temporal patterns and reduce data noise.

House Price Prediction

🔗 Repository

- Engineered a predictive regression pipeline for housing prices using statistical machine learning techniques.
- Conducted comprehensive **Exploratory Data Analysis (EDA)** and strategic **feature selection** across 79 variables.

Inception of Things

🔗 Repository

- Deployed a multi-node **Kubernetes (K3s/K3d)** cluster with custom routing and automated multi-VM provisioning.
- Established a Continuous Delivery (CD) pipeline utilizing **GitOps** practices for real-time infrastructure state synchronization.

Transcendence

🔗 Repository

- Developed a full-stack web app for ping pong matches with real-time chat using **Django**, **PostgreSQL**, **JS**, **HTML**, and **CSS**.

EDUCATION

UM6P - 1337 Coding School (42 Network)

2022 – 2026

Computer Science

Benguerir, Morocco

Cadi Ayyad University

2020 – 2022

Physics

Marrakesh, Morocco

SKILLS

Machine Learning : Pandas, NumPy, Matplotlib, Scikit-learn, Regression, Neural Networks, Random Forest, XGBoost, RAG

Programming Languages : C, C++, Python, Java, JavaScript

Web Frameworks : Spring Boot, Django, React

Tools & Technologies : Docker, Kubernetes, Git, Figma, Linux, Bash, Make

Core Competencies : Data Structures & Algorithms (200+ LeetCode problems solved)

LANGUAGES

Arabic : Native

English : Intermediate

French : Conversational
